For exceeding the greater of 0.50 m 0.08 / km, For exceeding the greater of 0.50 m 0.08 / km, For exceeding the greater of 0.50 m 0.08 / km. For exceeding the greater of 0.50 m 0.16 € / km. When the vehicle , with or without load exceeds the allowed length , width and height, in many places , accounted for the largest dimension of each overdraft and overdraft for each type separately.

Special transport fee for exceeding the maximum permissible total weight of:
- for exceeding the maximum permissible total weight of the vehicle or combination of vehicles above 40 t, 44 t or above for
three-axle motor vehicle with two-axle or a triaxial semitrailer when transporting 40 -stopni ISO container as a combined
transport operation applies to benefits given in Table 1 which is attached as an integral part of this decision.
Overdrafts total mass of paragraph 1 of this Article, whose values end up to 0.5 t, rounded to the lower whole value exceeding a
total weight of whose values end up above 0.5 t, rounded up to the higher value of the whole
Special transport fee for exceeding the permitted axle load
For exceeding the maximum permissible axle load of the vehicle or combination of vehicles, the fee is paid out in Table 2, which
is attached as an integral part of this decision.
The fee referred to in paragraph 1 of this Article shall be calculated as follows :
- The single axis, according to the formula:
Pyo = Sjo - Djo
whereby the actual axle load for each axle (Sjo) wins the permitted axle load (Djo), for a given value exceeding (IPO)
complains that the relevant amount set out in Table 2 which is attached as an integral part of this decision.
- For a double, trice and multiple axles, according to the formula:
Sjo - Djo
Pyo =
Во
Whereby the actual axle load of a double, triplet or a multi-axis (Sjo) wins the permitted axle load (Djo) and divided by the number of
axles (Bo), for a given value exceeding (IPO) complains that the relevant amount set out in Table 2 which is attached as an integral part
of this decision.

	The resulting exceeding axle load referred to in paragraph 2, line 1 and 2 of this Article, whose values end up to 0.50 t shall be rounded to the lower whole value, and whose value exceeding end over 0,5t rounded up to the higher value of the whole. The sum of the alleged benefits of the shaft or axle sets from paragraph 2 of this article, makes the total compensation for exceeding the permissible axle load. Total compensation for extraordinary transport is calculated by dividing the fee for individual overdraft (€ / km) multiplied by the distance (km) from the place of departure to the arrival of emergency transport. If a vehicle or combination of vehicles with or without a load, go over the prescribed limit under Article 5 of this decision, the total fee is calculated, so that the compensation for each individual overdraft (€ / km) be brought together and multiplied by the distance (km) from the place of departure to arrival of emergency transport. When calculating the total mileage of emergency transport, each started kilometer is taken as a full mile
